## REQUEST FOR INFORMATION ON USE OF ICPSR RESOURCES

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

## DATA DISCLAIMER

The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## SUMMARY

This study was undertaken to examine the ways in which different felony sanctions impact the future behavior of felony offenders. The study sought to determine whether the following made a difference in subsequent criminal behavior: (1) sentences of confinement, (2) the length of sentence (both the sentence imposed and that which was actually served), and (3) sentences of probation combined with jail ("split" sentences), or combined with fines, restitution, or other alternative sanctions. Data were collected from questionnaires completed by 18 judges of the Essex County, New Jersey, courts and by probation staff. Follow-up data were collected from official records provided by probation, jail, prison, and parole case files. Follow-up data were also collected from the following official records: (1) the New Jersey Offender-Based Transaction System Computerized Criminal History, (2) the New Jersey Department of Corrections Offender-Based Correctional Information System, (3) the United States Department of Justice Interstate Identification Index, (4) the National Crime Information Center Wanted Persons File, (5) the New Jersey PROMIS/GAVEL Prosecutors Case Tracking System, and (6) administrative record files of the New Jersey Department of Corrections. Variables in the data file include the most serious offense charge, most serious offense of conviction, dimension of conviction, offense type (person, property, social order, fraud, or drug offense), number of prior probations, number of probation revocations, number of prior jail and prison terms, mitigating and aggravating factors affecting the sentence, type of sentence, special conditions of probation, fines and restitutions imposed, minimum and maximum incarceration terms (in months), history of drug offenses, type of drugs used, probation and parole violations, total number of prior arrests and prior convictions, and longest arrest-free period after first arrest. The type of post-sentence offense, dimension, disposition charge, sentence, and date of arrest are provided for arresting events and charge episodes 1 through 108 for any offender. For up to 43 arrest events (for any offender), the date of lockup and date of exit from confinement are provided. The file also includes recommendations made by prosecutors and probation officers, and judges' ratings (on a scale of one to nine) with respect to the likelihood of an offender committing future property crimes, crimes against persons, or any crime. Judges also rated the arrest record length, conviction record length, and social stability of each offender. Retribution points, incapacitation points, and specific deterrence points assigned by the judges complete the file. Demographic variables include the race and sex of each convicted offender, and the age of the offender at first conviction.

## GENERAL STUDY OVERVIEW

## STUDY IDENTIFICATION

CRIME CONTROL EFFECTS OF SENTENCING IN ESSEX COUNTY, NEW JERSEY,  
1976-1997

Don M. Gottfredson

Award No. 95-IJ-CX-0118

## KEY WORDS

offenders, probation, sanctions, sentencing

## PURPOSE OF THE STUDY

Typically, sentencing reform policies aimed at crime control, as well as arguments for and against the use of various alternative punishments, have been developed without rigorous analyses or careful examination of the results of sanctioning practices. Experimental design is generally not feasible in making sound comparisons of results regarding various punishments, because achieving equivalence among the groups compared is rarely possible at sentencing. Thus, complete results on the impact of sentencing and sanctioning practices are not available. Punishment policies have, therefore, been developed without full information about how sanctioning modifies, controls, or enhances the likelihood of future criminal behavior by a convicted offender. By relying on a rigorous quasiexperimental design based on multivariate models of judicial sentencing behavior, this study sought to examine the ways in which different felony sanctions impact the future behavior of felony offenders. This study attempted to determine whether the following made a difference in subsequent criminal behavior: (1) sentences of confinement, (2) the length of sentence (both the sentence imposed and that which was actually served), and (3) sentences of probation combined with jail ("split" sentences), or combined with fines, restitution, or other alternative sanctions.

## METHODS

## STUDY DESIGN

Data were first collected from two sources: questionnaires completed by 18 judges in Essex County, New Jersey, courts, and reports by probation staff. Follow-up data were extracted from official records in two waves -- first, from probation, jail, prison, and parole files, and second, from several databases and additional sources. Judges completed questionnaires for a sample of offenders sentenced between May 1976 and June 1977. The questionnaires, designed with the help of the judges, provided data on their perceptions and judgments of the offense, offender, and sentencing decision. Each judge specifically provided a description of the actual sentence imposed, assessments of the seriousness of the offense, an estimate of the propensity of the offender to commit future crimes, a judgment of the lengths of the prior arrest and conviction records, a rating of the seriousness of prior records, an assessment of the social stability of the offender, and a listing of the mitigating or aggravating factors affecting the choice of sentence. All judges in the Essex County courts with assignments to criminal cases participated. One judge experienced lengthy trials, and so his few cases were excluded. All other judges (including those assigned only welfare fraud cases) were included. Users of the data should note the following: (1) There is the possibility of selection bias by the judges in regard to the choice of one sentence alternative over another. (2) There is no assurance that the judges had equivalent cases. Comparisons of judges' cases were made by analysis of variance of selected variables, and results suggest that caution be used in assuming that the 18 judges had cases that could be considered equivalent in all respects. The second source of data came from probation staff, who provided objective items extracted from criminal case files, which included charged and convicted offenses, the number of prior probations, probation revocations, jail terms, prison terms, sentence recommendations of the prosecutor and of the probation department, and information on previous sentences being served by the offender at the time of the sentencing. These data were collected after sentencing and were not systematically provided to the judges, but usually were included in the presentence report. After approximately one year, the first wave of follow-up data was initiated to determine how the sentences were actually carried out by the correctional system. These data were collected from probation, jail, prison, and parole files and included detailed data about offenders who were in community programs during the first few years after sentencing. The second wave of follow-up data began in October 1995 and ended in February 1997. In order to assess the impact of sentencing on subsequent criminal behavior, data were extracted from the following sources: (a) the New Jersey Offender-Based Transaction

System Computerized Criminal History, which included New Jersey arrest records, with arrest and conviction data dating from 1972 to the present, (b) the New Jersey Department of Corrections Offender-Based Correctional Information System, which included correctional history data on admissions, departures, and status of state prisoners dating back to 1976, (c) the United States Department of Justice Interstate Identification Index, which included out-of-state records of arrests and convictions from the date of entry into the criminal justice system, (d) the National Crime Information Center Wanted Persons File, which provided current outstanding warrants from New Jersey and other state law enforcement agencies, (e) the New Jersey PROMIS/GAVEL Prosecutors Case Tracking System, used on a selective basis, which included pending or open New Jersey charges, and (f) administrative record files of the New Jersey Department of Corrections, also used on a selective basis, which included data on entry, transfer, and exits from the New Jersey prisons.

#### SOURCES OF INFORMATION

Data were collected from questionnaires completed by 18 judges of the Essex County, New Jersey, courts. Follow-up data were collected from official records provided by probation, jail, prison, and parole case files. Official records were also collected from: (1) the New Jersey Offender Based Transaction System Computerized Criminal History, (2) the New Jersey Department of Corrections Offender Based Correctional Information System, (3) the United States Department of Justice Interstate Identification Index, (4) the National Crime Information Center Wanted Persons File, (5) the New Jersey PROMIS/GAVEL Prosecutors Case Tracking System, and (6) administrative record files of the New Jersey Department of Corrections.

#### SAMPLE

All judges in the Essex County, New Jersey, courts with assignments to criminal cases participated in the study (with exceptions noted previously). The sample is composed of all offenders sentenced by these judges between May 1976 and June 1977. An assignment judge assigned cases on the basis of a judge's availability. Originally, researchers received questionnaires completed for 982 cases. Further examination showed that 6 records were duplicates, and 14 offenders were returned to court during the data collection period and were sentenced a second time. In these cases, only the first sentencing was included. Therefore, the total sample was reduced from the original 982 questionnaires completed by the judges to the 962 cases used in the full sample. Of the sample of 962, no post-sentencing record could be found for 37 persons after an

exhaustive search. These 37 cases were coded as having no known further criminal record.

#### RESPONSE RATES

Not applicable.

#### DATE(S) OF DATA COLLECTION

May 1976-June 1977 and October 1995-February 1997

### SUMMARY OF CONTENTS

#### DESCRIPTION OF VARIABLES

Variables include the most serious offense charge, most serious offense of conviction, dimension of conviction, offense type (person, property, social order, fraud, or drug offense), number of prior probations, number of probation revocations, number of prior jail and prison terms, mitigating and aggravating factors affecting the sentence, type of sentence, special conditions of probation, fines and restitutions imposed, minimum and maximum incarceration terms (in months), history of drug offenses, type of drugs used, probation and parole violations, total number of prior arrests and prior convictions, and longest arrest-free period after first arrest. The type of offense, dimension, disposition charge, sentence, and date of arrest are provided for arresting events and charge episodes 1 through 108 for any offender. For up to 43 arrest events (for any offender), the date of lockup and date of exit from confinement are provided. The file also includes recommendations made by prosecutors and probation officers, and judges' ratings (on a scale of one to nine) with respect to the likelihood of an offender committing future property crimes, crimes against persons, or any crime. Judges also rated the arrest record length, conviction record length, and social stability of each offender. Retribution points, incapacitation points, and specific deterrence points assigned by the judges complete the file. Demographic variables include the race and sex of each convicted offender, and age of offender at first conviction.

#### PRESENCE OF COMMON SCALES

None.

## UNIT OF OBSERVATION

Individuals.

## EXTENT OF PROCESSING

Missing data codes were standardized by the principal investigator and ICPSR. ICPSR checked for undocumented codes, produced a codebook, generated SAS and SPSS data definition statements, converted the hardcopy documentation to a PDF file, and reformatted the data and documentation.

## EXTENT OF COLLECTION

This data collection contains one data file with a PDF user guide, a codebook and data collection instrument in a separate PDF file, and SAS and SPSS data definition statements.

## DATA COLLECTION NOTES

The user guide and the codebook and data collection instrument are provided by ICPSR as Portable Document Format (PDF) files. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

## FILE SPECIFICATIONS

#### FINAL REPORTS AND OTHER PUBLICATIONS

The National Criminal Justice Reference Service (NCJRS) was established in 1972 by the National Institute of Justice (NIJ), of the U.S. Department of Justice, to provide research findings to criminal justice professionals and researchers. NCJRS operates specialized clearinghouses that are staffed by information specialists who supply a range of reference, referral, and distribution services. Final reports and other publications describing research conducted on a variety of criminal justice topics are available. Publications can be obtained from NCJRS at NIJ/NCJRS, Box 6000, Rockville, MD, 20849-6000, 800-851-3420 or 301-519-5500. TTY Service for the Hearing Impaired is 877-712-9279 (toll-free) or 301-947-8374 (local). The URL for the NCJRS homepage is:

<http://www.ncjrs.org>

#### DATA RESOURCES PROGRAM ON THE INTERNET

The National Institute of Justice Data Resources Program (DRP) makes datasets from NIJ-funded research and evaluation projects available to the research community and sponsors research and training activities devoted to secondary data analysis. Datasets are archived by the National Archive of Criminal Justice Data (NACJD) at the Inter-university Consortium for Political and Social Research (ICPSR) at the University of Michigan.

The NACJD maintains a World Wide Web site with instructions for transferring files and sending messages. Criminal justice data funded by the Department of Justice are available via the Internet at this site at no charge to the user. NACJD may be contacted at NACJD/ICPSR, P.O. Box 1248, Ann Arbor, MI, 48106-1248, 800-999-0960 or 734-998-9825. The URL for the NACJD homepage is:
