SUMMARY

This study examined various ways states approach and sanction sex crimes (i.e., child sexual abuse, incest, and sexual assault) and sex offenders. The aim of the study was to obtain basic information about policies and procedures of probation and parole agencies with respect to adult sex offender case management. State corrections administrators in 49 states and the District of Columbia were contacted to supply information on their states' probation and parole offices and the corresponding jurisdictions. From these offices, probation and parole supervisors at the office-management level were selected as survey respondents because of their familiarity with the day-to-day office operations. Respondents were asked about the usage of various supervision methods, such as electronic monitoring, requiring offenders on probation or parole to register with law enforcement agencies, and polygraph testing. Sanctions such as requiring the offenders to seek treatment and forbidding contact with the victim were discussed, as were various queries about the handling of the victim in the case (whether a written statement by the victim was routinely included in the offender's file, whether officers usually had contact with the victim, and whether there was a system for advising victims of status changes for the offender). Other questions focused on whether the office used specialized assessments, caseloads, programs, and policies for sex offenders that differed from those used for other offenders. Various issues regarding treatment for offenders were also examined: who chooses and pays the treatment provider, whether the agency or the court approves treatment providers, what criteria are involved in approval, and whether the office had an in-house sex offender treatment program.

PURPOSE OF THE STUDY

This study was designed to examine various ways states approach and sanction sex crimes (i.e., child sexual abuse, incest, and sexual assault). The aim of the study was to obtain basic information about policies and procedures of probation and parole agencies with respect to adult sex offender case management.

METHODS

STUDY DESIGN

A 16-page questionnaire was developed by researchers from the Colorado Division of Criminal Justice and reviewed by members of the project's Advisory Board. A telephone survey was selected as the method most likely to ensure data quality and target the correct respondent. The survey instrument, a mixture of Likert scale questions, dichotomous (yes/no) questions, and open-ended questions, was pre-tested at several sites in April 1994. Subsequently, modifications were made to improve the instrument. Then a team of three interviewers who had experience working in the criminal justice system was selected to conduct the telephone survey, which was conducted from offices at the Colorado Division of Criminal Justice in Denver. The interviewers underwent extensive in-house training in a week-long program that included in-depth coverage of the content of

the questionnaire and mock telephone interviews. Names of state correctional administrators were obtained from the 1992-1994 AMERICAN CORRECTIONAL ASSOCIATION PROBATION AND PAROLE DIRECTORY and the American Probation and Parole Association member list. The state correctional administrators were telephoned and asked to provide a list of probation and parole offices in their state and the corresponding jurisdictions. Based on these lists, offices were assigned, according to county(s), to one of four quadrants within each state. Probation and parole supervisors at the office-management level were randomly selected to be interviewed from the quadrant-office lists (per population density). The office supervisors were selected as survey respondents because of their familiarity with the day-to-day office operations.

SOURCES OF INFORMATION

Data were collected through a telephone survey of supervisors of probation and parole agencies.

SAMPLE

The sample for the telephone survey covered 49 states and the District of Columbia. South Dakota was not included in the study because information about sampling units was not furnished upon request. The sample was stratified based on geography and population density. Each state was divided into four (generally equal) geographic quadrants and, using population figures from the 1990 Census, one respondent was selected per every 500,000 or fewer people in each quadrant. The Arizona parole system, Nebraska probation and parole systems, New York parole system, and Virginia probation and parole systems were partially represented, either because there were multiple offices managed by a single supervisor, some offices handled misdemeanants only, or several offices had been combined due to downsizing.

RESPONSE RATES

Of the original 873 probation and parole offices identified, 758 (86.8 percent) were contacted by interviewers. Of these, 732 supervisors agreed to participate in the hour-long interview, resulting in an overall response rate of 96.6 percent. Nearly all of the 3.4 percent who refused to participate in the study mentioned time constraints as the reason for refusal.

SUMMARY OF CONTENTS

DESCRIPTION OF VARIABLES

Respondents were asked about the usage of various supervision methods, such as electronic monitoring, requiring offenders on probation or parole to register with law enforcement agencies, and polygraph testing. Sanctions such as requiring the offenders to seek treatment and forbidding contact with the victim were discussed, as were various queries about the handling of the victim in the case (whether a written statement by the victim was routinely included in the offender's file, whether officers usually had contact with the victim, and whether there was a system for advising victims of status changes for the offender). Other questions focused on whether the office used specialized assessments, caseloads, programs, and policies for sex offenders that differed from those used for other offenders. Various issues regarding treatment for offenders were also examined: who chooses and pays the treatment provider, whether the agency or the court approves treatment providers, what criteria are involved in approval, and whether the office had an in-house sex offender treatment program. The names for offenses with the same elements sometimes varied between states. Due to the variation in the number and types of sex offense categories across states, as well as differences in their elements, offenses were identified by their elements to ensure consistency across all states.

PRESENCE OF COMMON SCALES

Several Likert-type scales were used.

UNIT OF OBSERVATION

Probation and parole agencies.

EXTENT OF PROCESSING

Missing data codes were standardized by the data producer. ICPSR scanned existing documentation and created a codebook. ICPSR also

performed checks for undocumented codes, reformatted the data, and created data definition statements.

EXTENT OF COLLECTION

This data collection contains one data file, a machine-readable codebook, SAS and SPSS data definition statements, and data collection instruments.

FINAL REPORTS AND OTHER PUBLICATIONS

The National Criminal Justice Reference Service (NCJRS) was established in 1972 by the National Institute of Justice (NIJ), of the U.S. Department of Justice, to provide research findings to criminal justice professionals and researchers. NCJRS operates specialized clearinghouses that are staffed by information specialists who supply a range of reference, referral, and distribution services. Final reports and other publications describing research conducted on a variety of criminal justice topics are available. Publications can be obtained from NCJRS at NIJ/NCJRS, Box 6000, Rockville, MD, 20850, 800-851-3420 or 301-251-5500. The URL for the NCJRS homepage is:

DATA RESOURCES PROGRAM ON THE INTERNET

The National Institute of Justice Data Resources Program (DRP) makes datasets from NIJ-funded research and evaluation projects available to the research community and sponsors research and training activities devoted to secondary data analysis. Datasets are archived by the National Archive of Criminal Justice Data (NACJD) at the Inter-university Consortium for Political and Social Research (ICPSR) at the University of Michigan.

The NACJD maintains a World Wide Web site with instructions for transferring files and sending messages. Criminal justice data funded by the Department of Justice are available via the Internet at this site at no charge to the user. NACJD may be contacted at NACJD/ICPSR, P.O. INTRODUCTION

Hello. My name is and I'm call from the Division of Criminal Justice in Colorado. A couple of weeks ago a letter was sent explaining that we are doing national research on sex offenders.

DO YOU RECALL GETTING THAT LETTER?

IF YES: Good. Just to review for you quickly, we have received a grant from the National Institute of Justice in D.C. and we are conducting a telephone survey on how probation and parole offices around the country are managing sex offenders on their caseloads.

IF NO: Let me take a minute of your time to explain what we are doing. We have received a grant from the National Institute of Justice in D.C. and we are conducting a telephone survey on how probation and parole offices around the country are managing sex offenders on their caseloads.

ARE YOU FAMILIAR WITH THE NATIONAL INSTITUTE OF JUSTICE?

IF YES: Then you are familiar with the types of research they do.

IF NO: Basically the National Institute of Justice is the research arm of

the Justice Department. They sponsor and/or conduct research throughout the field of criminal justice. We are conducting a survey for them.

WE ARE LEARNING A LOT OF VALUABLE INFORMATION FROM ACROSS THE COUNTRY. I AM HOPING THAT YOU WILL ALSO BE WILLING TO PARTICIPATE IN THE SURVEY. THE SURVEY WILL TAKE 30 TO 45 MINUTES OF YOUR TIME. DO YOU HAVE TIME NOW?

IF YES: Great. Let's get started.

IF NO: May we set a future appointment? Would morning or afternoon be better for you?

DATE OF APPOINTMENT ____/____/____ TIME OF APPOINTMENT _____
YOUR TIME

IMPORTANT!!!!!! DOUBLE CHECK TIME DIFFERENCE!!!!!!

(If any doubt) let me just double check that you are the person that I should be talking to. Are you the person who is responsible for the day to day management of your office location?

And your job title is: _____

Thanks. I'll call you on repeat as necessary. _____

IF THE ANSWER IS NO, FIND OUT WHO IS IN CHARGE AND END INTERVIEW.

1. Does your office supervise ADULT FELONY SEX OFFENDERS on

PROBATION	PAROLE
1 yes	1 yes
0 no	0 no

8 N/A

8 N/A

If no, see below

If no, see below

If the answer to either section of question 1 is no, ask the following questions:

Why is it that you don't supervise any adult felony sex offenders on PROBATION PAROLE ??

(This question will also serve to double-check that the question has been understood, and the answer is accurate)

(If the answer to both probation and parole is no, end interview here.)

(If the answer to either probation or parole, or both, is yes, continue with the next question.)

2. Next, would you list the counties in the jurisdiction covered by the office you manage.

3. Is your jurisdiction mostly:

- 1 urban
- 2 suburban
- 3 rural
- 4 1&2
- 5 1&3
- 6 2&3
- 7 1&2&3

4. How many officers (that carry a caseload) do you have in your jurisdiction?

a. Probation: _____

b. Parole: _____

c. Combined probation and parole: _____

OK, I'm going to ask you a series of questions about how your office is managing sex offenders. Unless I explain differently, the questions will refer to adult felony sex offenders. OK? When you answer the questions please answer for your whole office and not just yourself.
